

USA TODAY/GALLUP POLL

APRIL WAVE 1

-- FINAL TOPLINE --

Timberline: 927911
G: 774
Princeton Job #: 11-04-007

Jeff Jones, Lydia Saad
April 20-23, 2011

Results are based on telephone interviews conducted April 20-23, 2011 with a random sample of **–1,013—**adults, aged 18+, living in all 50 U.S. states and the District of Columbia.

For results based on the total sample of national adults, one can say with **95%** confidence that the margin of error is **±4** percentage points.

For results based on the sample of **–536—**national adults in Form C and **–477—**national adults in Form D, the maximum margins of sampling error are **±5** percentage points.

For results based on the sample of **–902—** registered voters, the maximum margin of sampling error is **±4** percentage points.

For results based on the sample of **–484—** Republicans and Republican-leaning independents, the maximum margin of sampling error is **±5** percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample includes a minimum quota of 400 cell phone respondents and 600 landline respondents, with additional minimum quotas among landline respondents for gender within region. Landline numbers are chosen at random among listed telephone numbers, cell phone numbers are selected using random-digit dial methods. Landline respondents are chosen at random within each household on the basis of which member had the most recent birthday.

Samples are weighted by gender, age, race, Hispanic ethnicity, education, region, adults in the household, and phone status (cell phone only/landline only/both, having an unlisted landline number, and being cell phone mostly). Demographic weighting targets are based on the March 2010 Current Population Survey figures for the age 18+ non-institutionalized population living in U.S. telephone households. All reported margins of sampling error include the computed design effects for weighting and sample design.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls.

26. Next, I'm going to ask you about some people who may run for president in 2012. For each one, please tell me whether you will definitely vote for that person, whether you might consider voting for that person, or whether you will definitely not vote for that person. How about – [RANDOM ORDER]?

<i>2011 Apr 20-23 based on registered voters (sorted by "definitely/might consider")</i>	Definitely vote for/ might consider voting for	Will definitely vote for	Might consider voting for	Definitely not vote for
Barack Obama	54	31	23	46
Mitt Romney	48	6	42	45
Mike Huckabee	46	7	39	46
Donald Trump	35	7	28	64
Sarah Palin	34	8	26	65

FULL RESULTS AND TRENDS:

A. Donald Trump

	Definitely vote for	Might consider voting for	Definitely not vote for	No opinion
<u>REGISTERED VOTERS</u>				
2011 Apr 20-23	7	28	64	2
<u>NATIONAL ADULTS</u>				
2011 Apr 20-23	6	27	63	3

For comparison: *In general, how likely are you to vote for Donald Trump if he runs as the Reform party's presidential candidate next November. Do you think you would definitely vote for Trump if he were the Reform party candidate, would you consider voting for him, or would you definitely not vote for that candidate?*

	Definitely vote for	Might consider voting for	Definitely not vote for	No opinion
