GALLUP POLL SOCIAL SERIES: MINORITY RIGHTS & RELATIONS/

-- FINAL TOPLINE --

Timberline: 937008
H: 636
Princeton Job #: 13-06-008

Jeff Jones, Lydia Saad
June 13-July 5, 2013

Results are based on telephone interviews conducted June 13-July 5, 2013 with 4,373—adults, aged 18+, living in all 50 U.S. states and the District of Columbia, including oversamples of black and Hispanic adults. All respondents had previously been interviewed in the Gallup Daily tracking survey. The total sample is weighted to represent racial and ethnic groups proportionately to their share of the U.S. population. For results based on this sample of national adults, one can say with 95% confidence that the margin of error is ± 2 percentage points.

For results based on sample of 2,149—non-Hispanic whites, the maximum margin of sampling error is ± 3 percentage points.

For results based on sample of 1,010— non-Hispanic blacks, the maximum margin of sampling error is ± 5 percentage points.

For results based on sample of 1,000—Hispanics, the maximum margin of sampling error is ± 6 percentage points. (332 out of the 1,000 interviews with Hispanics were conducted in Spanish).

For results based on sample of 2,261—men, the maximum margin of sampling error is ± 3 percentage points.

For results based on sample of 2,112—women, the maximum margin of sampling error is ± 4 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, and phone status (cell phone-only/landline only/both and cell phone mostly). Demographic weighting targets are based on the March 2012 Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the July-December 2011 National Health Interview Survey. Population density targets are based on the 2010 census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls.

34. Can you think of any occasion in the last thirty days when you felt you were treated unfairly in the following places because you were black? How about – [RANDOM ORDER]?

2013 Jun 13-Jul 5
(sorted by “yes”)

	Yes, unfairly	No, not
In a store where you were shopping	24	76
In dealings with the police, such as traffic incidents	17	81
In a restaurant, bar, theater, or other entertainment place	16	84
At your place of work	15	81
While getting healthcare for yourself or a family member	9	90
