ISSUE REFERENDUM

Results are based on telephone interviews with –1,040– national adults, aged 18+, conducted November 5-6, 2013. For results based on the total sample of National Adults, one can say with 95% confidence that the margin of error is ± 4 percentage points.

For results based on the sample of –510—national adults in Form A and –530—national adults in Form B, the margins of sampling error are ± 5 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 50% cell phone respondents and 50% landline respondents, with additional minimum quotas by region. Landline and cell phone numbers are selected using random digit dial methods. Landline respondents are chosen at random within each household on the basis of which member had the most recent birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, and phone status (cell phone-only/landline only/both, cell phone mostly). Demographic weighting targets are based on the March 2012 Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the July-December 2011 National Health Interview Survey. Population density targets are based on the 2010 census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls.

1. Next, suppose that on Election Day you could vote on key issues as well as candidates. Would you vote for or against a law that would– [RANDOM ORDER]?

2013 Nov 5-6
Sorted by “vote for”

	Vote for	Vote against	No opinion
^ Raise the federal minimum wage to nine dollars an hour	76	22	3
† Raise the federal minimum wage to nine dollars an hour with automatic increases tied to the inflation rate	69	28	3
Make it illegal to discriminate in the workplace on the basis of sexual orientation or gender identity	63	31	6

^ Based on --510-- national adults in Form A.

† Based on --530-- national adults in Form B.
