DRUGS AND TRAFFIC SAFETY

Results are based on telephone interviews with a random sample of ~1,007– national adults, aged 18+, living in all 50 states and the District of Columbia, conducted June 24-25, 2015. For results based on the total sample of National Adults, the margin of error is ± 4 percentage points at the 95% confidence level.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 50% cell phone respondents and 50% landline respondents, with additional minimum quotas by time zone within region. Landline and cell phone numbers are selected using random digit dial methods. Landline respondents are chosen at random within each household on the basis of which member had the most recent birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, and phone status (cell phone-only/landline only/both, cell phone mostly). Demographic weighting targets are based on the March 2014 Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the January-June 2014 National Health Interview Survey. Population density targets are based on the 2010 census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls.

2. Do you think people driving impaired by each of the following substances is a very serious problem on the roads today, a somewhat serious problem, or not much of a problem? [RANDOM ORDER].

<i>2015 Jun 24-25</i> <i>(sorted by "very serious")</i>	Very serious	Somewhat serious	Not much of a problem	No opinion
	%	%	%	%
Alcohol	79	18	2	1
Prescription painkillers	41	42	15	2
Marijuana	29	39	31	2
Prescription anti-depressants	28	36	33	3
