**GALLUP POLL NEWS SERVICE:
JUNE WAVE 1**

-- FINAL TOPLINE --

Timberline: 937008
JT: 208
Princeton Job #: 18-06-006

Jeff Jones, Lydia Saad
June 1-13, 2018

Results are based on telephone interviews conducted June 1-13, 2018 with a random sample of –1,520—adults, ages 18+, living in all 50 U.S. states and the District of Columbia. For results based on this sample of national adults, the margin of sampling error is ± 3 percentage points at the 95% confidence level.

For results based on the sample of –765—national adults in Form A, the margin of sampling error is ± 4 percentage points.

For results based on the sample of –755—national adults in Form B, the margins of sampling error is ± 4 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 70% cell phone respondents and 30% landline respondents, with additional minimum quotas by time zone within region. Landline and cell phone telephone numbers are selected using random digit dial methods. Gallup obtained sample for this study from Survey Sampling International. Landline respondents are chosen at random within each household on the basis of which member has the next birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, and phone status (cell phone-only/landline only/both and cell phone mostly). Demographic weighting targets are based on the March 2017 Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the July-December 2017 National Health Interview Survey. Population density targets are based on the 2010 census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls. For questions about how this survey was conducted, please contact galluphelp@gallup.com.

8. Now I am going to read you a list of institutions in American society. Please tell me how much confidence you, yourself, have in each one -- a great deal, quite a lot, some, or very little? First..., Next..., [RANDOM ORDER]

<i>2018 Jun 1-13</i> <i>(sorted by "a great deal/quite a lot")</i>	Great <u>deal</u>	Quite <u>a lot</u>	<u>Some</u>	Very <u>little</u>	None <u>(vol.)</u>	No <u>opinion</u>	Great deal/ Quite a lot
The military	43	31	20	5	*	1	74
Small business	32	35	26	6	*	*	67
The police	29	25	31	14	1	1	54
