POST-ELECTION

Results are based on telephone interviews with a random sample of – 1,499-- national adults, aged 18+, living in all 50 states and the District of Columbia, conducted November 13-18, 2018.

For results based on the total sample of national adults, the margin of error is ± 3 percentage points at the 95% confidence level.

For results based on the sample of – 668 -- Democrats and Democrat-leaning independents, the margin of error is ± 5 percentage points at the 95% confidence level.

For results based on the sample of – 671 -- Republicans and Republican-leaning independents, the margin of error is ± 5 percentage points at the 95% confidence level.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 70% cell phone respondents and 30% landline respondents, with additional minimum quotas by time zone within region. Landline and cell phone numbers are selected using random digit dial methods. Gallup obtained this sample from Survey Sampling International. Landline respondents are chosen at random within each household on the basis of which member has the next birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, and phone status (cell phone-only/landline only/both, cell phone mostly). Demographic weighting targets are based on the March 2017 Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the July-December 2017 National Health Interview Survey. Population density targets are based on the 2010 census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls. For questions about how this survey was conducted, please contact galluphelp@gallup.com.

9. *(Asked of Democrats and Democratic leaning independents)* If you had to choose, would you rather see the Democratic Party – [ROTATED: become more liberal (or) become more moderate]?

BASED ON –668—DEMOCRATS AND DEMOCRATIC LEANERS

	<u>More liberal</u>	<u>More moderate</u>	<u>No opinion</u>
2018 Nov 13-18	41	54	5
2005 Jan 14-16	35	59	6

10. *(Asked of Republicans and Republican leaning independents)* If you had to choose, would you rather see the Republican Party – [ROTATED: become more conservative (or) become more moderate]?

BASED ON –671—REPUBLICANS AND REPUBLICAN LEANERS

	<u>More conservative</u>	<u>More moderate</u>	<u>No opinion</u>
2018 Nov 13-18	57	37	6
