**GALLUP POLL SOCIAL SERIES:
ECONOMY AND PERSONAL FINANCE**

-- FINAL TOPLINE --

Timberline: 937008
JT: 283
Princeton Job #: 19-04-006

Jeff Jones, Lydia Saad
April 1-9, 2019

Results are based on telephone interviews conducted April 1-9, 2019 with a random sample of –1,012—adults, ages 18+, living in all 50 U.S. states and the District of Columbia. For results based on this sample of national adults, the margin of sampling error is ± 4 percentage points at the 95% confidence level.

For results based on the sample of –497-- adults employed full- or part-time, the margin of sampling error is ± 5 percentage points.

For results based on the sample of –630-- stock owners, the margin of sampling error is ± 5 percentage points.

For results based on the sample of –351-- retirees, the margin of sampling error is ± 7 percentage points.

For results based on the sample of –661-- non-retirees, the margin of sampling error is ± 5 percentage points.

For results based on the sample of –692-- homeowners, the margin of sampling error is ± 5 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 70% cell phone respondents and 30% landline respondents, with additional minimum quotas by time zone within region. Landline and cell phone telephone numbers are selected using random digit dial methods. Gallup obtained sample for this study from Survey Sampling International. Landline respondents are chosen at random within each household on the basis of which member has the next birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, and phone status (cell phone-only/landline only/both and cell phone mostly). Demographic weighting targets are based on the March 2018 Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the January-June 2018 National Health Interview Survey. Population density targets are based on the 2010 census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls. For questions about how this survey was conducted, please contact galluphelp@gallup.com.

7. How would you rate your financial situation today – as excellent, good, only fair, or poor?

	<u>Excellent</u>	<u>Good</u>	<u>Only fair</u>	<u>Poor</u>	<u>No opinion</u>

15. Next, please tell me how concerned you are right now about each of the following financial matters, based on your current financial situation -- are you very worried, moderately worried, not too worried, or not worried at all. If a particular item does not apply to you, please say so. First, how worried are you about-- [ITEMS A-G ROTATED, ITEM H READ LAST]?

<i>2019 Apr 1-9</i> <i>(sorted by "total worried")</i>	Very worried	Mod-erately worried	Total Worried	Total Not worried
Not having enough money for retirement	27	27	54	42
Not being able to pay medical costs of a serious illness/accident	30	21	51	47
Not being able to pay medical costs for normal health care	24	18	42	55
Not being able to maintain the standard of living you enjoy	19	23	42	57
Not having enough money to pay for your children's college	22	14	36	33
Not having enough to pay your normal monthly bills	19	17	36	63
Not being able to pay your rent, mortgage or other housing costs	16	14	30	64
Not being able to make the minimum payments on your credit cards	10	10	20	63

GALLUP NEWS SERVICE

FEBRUARY WAVE 2

-- FINAL TOPLINE --

Timberline: 937008
JT: 271
Princeton Job #: 19-02-004

Jeff Jones, Lydia Saad
February 12-28, 2019

Results are based on telephone interviews conducted February 12-28, 2019 with a random sample of –1,932—adults, ages 18+, living in all 50 U.S. states and the District of Columbia. For results based on this sample of national adults, the margin of sampling error is ± 3 percentage points at the 95% confidence level.

For results based on the sample of –932—national adults in Form A, the margin of sampling error is ± 4 percentage points.

For results based on the sample of –1,000—national adults in Form B, the margins of sampling error is ± 4 percentage points.

For results based on the sample of –1,053—men, the margins of sampling error is ± 4 percentage points.

For results based on the sample of –879—women, the margins of sampling error is ± 4 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 70% cell phone respondents and 30% landline respondents, with additional minimum quotas by time zone within region. Landline and cell phone telephone numbers are selected using random digit dial methods. Gallup obtained sample for this study from Survey Sampling International. Landline respondents are chosen at random within each household on the basis of which member has the next birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, and phone status (cell phone-only/landline only/both and cell phone mostly). Demographic weighting targets are based on the March 2018 Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the January-June 2018 National Health Interview Survey. Population density targets are based on the 2010 census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls. For questions about how this survey was conducted, please contact galluphelp@gallup.com.

5. Next, which of the following statements best describe the current financial situation in your household -- you are saving a lot, you are saving a little, you are just managing to make ends meet on your income, you are having to draw on your savings, you are running into debt?

	<u>Saving a lot</u>	<u>Saving a little</u>	<u>Just managing to make ends meet</u>	<u>Having to draw on savings</u>	<u>Running into debt</u>	<u>Mixed/ Neither (vol.)</u>	<u>No opinion</u>
