

Survey Methods

Results for this CFA/Gallup study are based on English- and Spanish-language mail surveys completed by 3,586 Arizona residents age 18 and older Aug. 28-Oct. 26, 2020. Address-based sampling methods were used to ensure the results were representative of the state's total adult population. Black and Native American residents were oversampled to ensure enough completed interviews to analyze their responses independently.

When a COVID-19 vaccine becomes available, will you choose to get it?
