## GALLUP POLL SOCIAL SERIES: VALUES AND BELIEFS

-- FINAL TOPLINE --

Results are based on telephone interviews conducted May 1-24, 2023, with a random sample of $-1,011$ adults, ages 18+, living in all 50 U.S. states and the District of Columbia. For results based on this sample of national adults, the margin of sampling error is $\pm \mathbf{4}$ percentage points at the $\mathbf{9 5 \%}$ confidence level.

For results based on the sample of -496-national adults in Form A and the sample of -515- national adults in Form $B$, the margin of sampling error is $\pm 5$ percentage points.

For results based on the sample of -887 —registered voters, the margin of sampling error is $\pm 4$ percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of $\mathbf{7 5 \%}$ cell phone respondents and $\mathbf{2 5 \%}$ landline respondents, with additional minimum quotas by time zone within region. Landline and cell phone telephone numbers are selected using random digit dial methods. Gallup obtained sample for this study from Dynata. Landline respondents are chosen at random within each household on the basis of which member has the next birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, and phone status (cell phone-only/landline only/both and cell phone mostly). Demographic weighting targets are based on the most recent Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the most recent National Health Interview Survey. Population density targets are based on the $\mathbf{2 0 2 0}$ census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls. For questions about how this survey was conducted, please contact galluphelp@gallup.com.
21. Next, I'm going to read you a list of issues. Regardless of whether or not you think it should be legal, for each one, please tell me whether you personally believe that in general it is morally acceptable or morally wrong. How about -- [RANDOM ORDER]?

## V. Changing one's gender

|  | Morally acceptable | Morally wrong | Depends on situation (vol.) | Not a moral issue (vol.) | $\begin{array}{r} \text { No } \\ \text { opinion } \end{array}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2023 May 1-24 | 43 | 55 | 2 | * | 1 |
| 2021 May 3-18 | 46 | 51 | 2 | * | * |

29. Next, we have a question about policies for competitive sports that have separate teams for male and female athletes. Do you think transgender athletes - [ROTATED: should be able to play on sports teams that match their current gender identity (or) should only be allowed to play on sports teams that match their birth gender]?

| Able to play on <br> teams that match | Only on teams that <br> match birth gender | No <br> opinion |  |
| :--- | ---: | ---: | ---: |
| 2023 May 1-24 | 26 | 69 | 5 |
| 2021 May 3-18 | 34 | 62 | 4 |

Finally, thinking about something else,
30. Do you have any friends or relatives or co-workers who have told you, personally, that they are transgender?
Yes No No opinion
