GAL 041
Princeton Job #: 25-01-002

January 21-27, 2025

Results are based on telephone interviews conducted January 21-27, 2025, with a random sample of –1,001— adults, ages 18+, living in all 50 U.S. states and the District of Columbia. For results based on this sample of national adults, the margin of sampling error is ± 4 percentage points at the 95% confidence level.

For results based on the sample of -- 501 -- national adults in Form A and the sample of --500-- national adults in Form B, the margin of sampling error is ± 6 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 80% cell phone respondents and 20% landline respondents, with additional minimum quotas by time zone within region. Landline and cell phone telephone numbers are selected using random digit dial methods. Landline respondents are chosen at random within each household on the basis of which member has the next birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, and phone status (cell phone-only/landline only/both and cell phone mostly). Demographic weighting targets are based on the most recent Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the most recent National Health Interview Survey. Population density targets are based on the 2020 census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls. For questions about how this survey was conducted, please contact galluphelp@gallup.com.

Finally, on a different subject,

Q.8/9 SPLIT SAMPLED

8. *(Asked of a half sample)* Are you in favor of daylight savings time, or not?

BASED ON – 501—NATIONAL ADULTS IN FORM A

	<u>Yes, in favor</u>	<u>No, not in favor</u>	<u>No opinion</u>
2025 Jan 21-27 ^	40	54	6
1999 Mar 30-31	73	23	4
1990 Sep 14-16	74	21	5
1957 Apr 6-11	57	40	3
1956 Jan 26-31	57	41	2
1940 Mar 15-20 †	55	40	9
1937 May 5-10 †	51	37	13

^ Asked of a half sample

† WORDING: Are you in favor of daylight saving time?

9. *(Asked of a half sample)* Which of the following would you prefer to have– [ROTATED: daylight savings time the whole year, including winter, daylight savings time part of the year and standard time part of the year, (or) standard time the whole year, including summer]?

BASED ON – 500—NATIONAL ADULTS IN FORM B

	<u>2025 Jan 21-27 ^</u>
Daylight savings time the whole year	24
Daylight savings time part of the year and standard time part of the year	19
Standard time the whole year, including summer	48
No opinion	8

^ Asked of a half sample

For comparison: Which of the following would you prefer: a) have daylight saving time the year round, b) have daylight saving time in summer and standard time the rest of the year, 3) have standard time the whole year, including summer?

	<u>1947 Feb 28-Mar 4</u>	<u>1946 Mar 29-Apr 3</u>
Daylight saving time the year round	15	19
Daylight savings time in summer and standard time the rest of the year	33	31
Standard time the whole year, including summer	47	45
No opinion	5	5
