GALLUP POLL SOCIAL SERIES MINORITY RIGHTS AND RELATIONS

-- FINAL TOPLINE --

Timberline: 937614
GAL: 047
Princeton Job #: 24-06-008

June 2-26, 2025

Results are based on telephone interviews conducted June 2-26, 2025 with a random sample of –1,402—adults, ages 18+, living in all 50 U.S. states and the District of Columbia, including oversamples of Black and Hispanic adults. The total sample is weighted to represent racial and ethnic groups proportionately to their share of the U.S. population. For results based on this sample of national adults, the margin of sampling error is ± 4 percentage points at the 95% confidence level.

For results based on sample of –744-- non-Hispanic white adults, the maximum margin of sampling error is ± 5 percentage points.

For results based on sample of –300-- non-Hispanic black adults, the maximum margin of sampling error is ± 7 percentage points.

For results based on sample of –300-- Hispanic adults, the maximum margin of sampling error is ± 7 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 80% cell phone respondents and 20% landline respondents, with additional minimum quotas by time zone within region. Landline and cell phone telephone numbers are selected using random digit dial methods. Gallup obtained sample for this study from Dynata (national sample) and Marketing Systems Group (Black and Hispanic oversamples). Landline respondents are chosen at random within each household on the basis of which member has the next birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, party identification and phone status (cell phone-only/landline only/both and cell phone mostly). Demographic weighting targets are based on the most recent Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the most recent National Health Interview Survey. Party identification targets are based on the average of the three most recent Gallup polls. Population density targets are based on the 2020 census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls. For questions about how this survey was conducted, please contact galluphelp@gallup.com.

12. In general, do you think that Black people have as good a chance as White people in your community to get any kind of job for which they are qualified, or don't you think they have as good a chance?

	Have as <u>good a chance</u>	Don't have as <u>good a chance</u>	No <u>opinion</u>
