GALLUP POLL SOCIAL SERIES:
THE ENVIRONMENT

-- FINAL TOPLINE --

Timberline: 937614
GAL 070
Princeton Job #: 26-03-003

March 2-18, 2026

Results are based on telephone interviews conducted March 2-18, 2026, with a random sample of –1,000— adults, ages 18+, living in all 50 U.S. states and the District of Columbia. For results based on this sample of national adults, the margin of sampling error is ±4 percentage points at the 95% confidence level.

For results based on the sample of –500—national adults in Form A and the sample of – 500-- national adults in Form B, the margin of sampling error is ±6 percentage points.

Interviews are conducted with respondents on landline telephones and cellular phones, with interviews conducted in Spanish for respondents who are primarily Spanish-speaking. Each sample of national adults includes a minimum quota of 80% cell phone respondents and 20% landline respondents, with additional minimum quotas by time zone within region. Landline and cell phone telephone numbers are selected using random digit dial methods. Landline respondents are chosen at random within each household on the basis of which member has the next birthday.

Samples are weighted to correct for unequal selection probability, non-response, and double coverage of landline and cell users in the two sampling frames. They are also weighted to match the national demographics of gender, age, race, Hispanic ethnicity, education, region, population density, party identification, and phone status (cell phone-only/landline only/both and cell phone mostly). Demographic weighting targets are based on the most recent Current Population Survey figures for the aged 18 and older U.S. population. Phone status targets are based on the most recent National Health Interview Survey. Party identification targets are based on the average of the three most recent Gallup polls. Population density targets are based on the 2020 census. All reported margins of sampling error include the computed design effects for weighting.

In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of public opinion polls. For questions about how this survey was conducted, please contact galluphelp@gallup.com.

Turning to something else,

14. I'm going to read you a list of environmental problems. As I read each one, please tell me if you personally worry about this problem a great deal, a fair amount, only a little, or not at all. First, how much do you personally worry about -- [RANDOM ORDER]?

2026 Mar 2-18 ***(sorted by "a great deal")***	Great deal	Fair amount	Only a little/ Not at all
Pollution of drinking water	56	26	18
Maintenance of the nation's supply of fresh water for household needs	53	26	21
Pollution of rivers, lakes, and reservoirs	50	32	18
The environmental impact of artificial intelligence, or AI, data centers	46	24	29
Global warming or Climate change	44	22	35
The loss of tropical rain forests	41	28	31
Air pollution	40	32	28
Extinction of plant and animal species	37	32	30
